INTENSIFIER

Hydraulic
Pressure Ratio 5:1

HB443

10,000 psi

CONVERTS LOW-PRESSURE PORTA-BLE HYDRAULIC PUMPS OR ON-BOARD HYDRAULIC SYSTEMS, INTO HIGH PRES-SURE POWER SOURCES.

- Applications include utilities, railroads, construction, riggers and others.
- Operates single or double-acting cylinders, jacks, and tools such as crimpers, spreaders, cable cutters, or tire tools. Version for use with double-acting torque wrenches available.

- May be used to operate two sepa-rate, single-acting tools (with inte-gral valves) independently, without need for additional manifold.
- Control valve included. Other Power Team valves available as an option to suit your specific application, if needed; consult factory.

- Compact and rugged for use inside a utility vehicle aerial bucket or stowing in a vehicle.
- No reservoir level to maintain; uses low pressure system as oil supply.
- Has $\frac{3}{8}$" NPTF ports; compatible with standard fittings for low and high pressure systems.

† For maximum efficiency, recommended input flow is 5 gpm at a maximum pressure of 2,000 psi. Higher flows and/or pressures must be compensated for at the system pump (e.g., relief valve, variable flow devices, etc.)

* **Posi-Check®** valve design, **Posi-Check®** guards against pressure loss when valve is shifted from "advance" position to "hold" position.
