PTO Application Work Sheet

INFORMATION FROM CUSTOMER:

A. Make and model of transmission.

B. Type of driven equipment.

C. Input horsepower required for driven equipment.

D. Operating speed of driven equipment.

E. Desired engine speed during operation.

-or-

PTO Ratio (if known)

F. From items C and D, determine the torque requirement of the driven equipment using this formula: $\frac{HP \times 5252}{RPM} = \text{lbs-ft.}$

RPM

For continuous operation divide by .7

(Torque \div .70) to get torque requirement for driven equipment.

G. Direction of driven equipment shaft rotation when equipment is mounted on vehicle.

H. Reverse gear requirements.

Yes_____ No_____

I. Type and size of PTO output required.
(i.e. driveshaft, direct mount pump).

USE HY25-3000/US CHELSEA APPLICATION CATALOG:

Steps to specifying proper PTO:

1. Application page number.

2. Select the proper PTO type (i.e. Mechanical, PowerShift, etc.).

3. Using the Application page number from step 1, find PTOs that meet or exceed the torque requirements of the application.

4. From that list, pick the unit that comes closest to satisfying the rotation and speed percentage for the application.

5. Note the PTO model number and all other kits required on the line to the right.

6. Determine what options are needed and change model number designators to obtain correct options (Shifter, Output, etc.).

CAUTION: It is very important to read all notes at the bottom of the Application Page. The notes contain warnings and/or special parts that need to be considered for that PTO application.

NOTE: Intermittent – Operating less than 5 minutes in a given 15 minute period of time.

Continuous – Operating longer than 5 minutes in a given 15 minute period of time.

Consult Chelsea Application Catalog HY25-3000/US for specific applications.

5. **Gears not shifted fully in mesh** – Check shift linkage for proper adjustments.
6. **Shift linkage too short** – Adjust linkage to permit full shift.

PowerShift PTO Won't Engage

1. **Incorrect high pressure line plumbing** – Correct plumbing as shown on installation instructions included with PTO.
2. **Incorrect electrical wiring** – Correct wiring as shown on wiring diagram in installation instructions included with PTO.
3. **Restriction in pressure line** – Check hose and fittings for obstructions.

Oil Leakage
