

- Push button square drive release
- Low friction bearings
- Patented torque transfer mechanism

- Interchangeable heads
- Low maintenance
- No tools required for head change
- Lightweight
- Multi-axis swivel

SPX Bolting Systems is a full service sales, rental, training and flange management software provider to the Oil & Gas and Power Generation Industries. With over 35 years experience manufacturing power packs through our sister company, Power Team, and now with the acquisition of Torque Tension Systems, Ltd., UK, we have over 70 years combined experience in flanged bolted connections. We are focused on the market and our customer base to provide the best tooling, bolting solutions and support the industry offers.

We have a new fleet of hydraulic torque wrenches, topside and subsea tensioners, nut splitters and hydraulic pump units for rental at our new facility in the Houston area. We have a full size range of all equipment ready to serve your needs 24/7. In addition, as a manufacturer, we can supply specially designed tooling to fit your unique application.

If managing a large bolting project, our Controller flange management software will make the job easier by providing accountability and traceability. We also have certified bolting training classes for your personnel to reduce your cost of bringing in a subcontractor for bolting services. Contact us for more information or a demo.

SALES • RENTAL • TRAINING • SOFTWARE

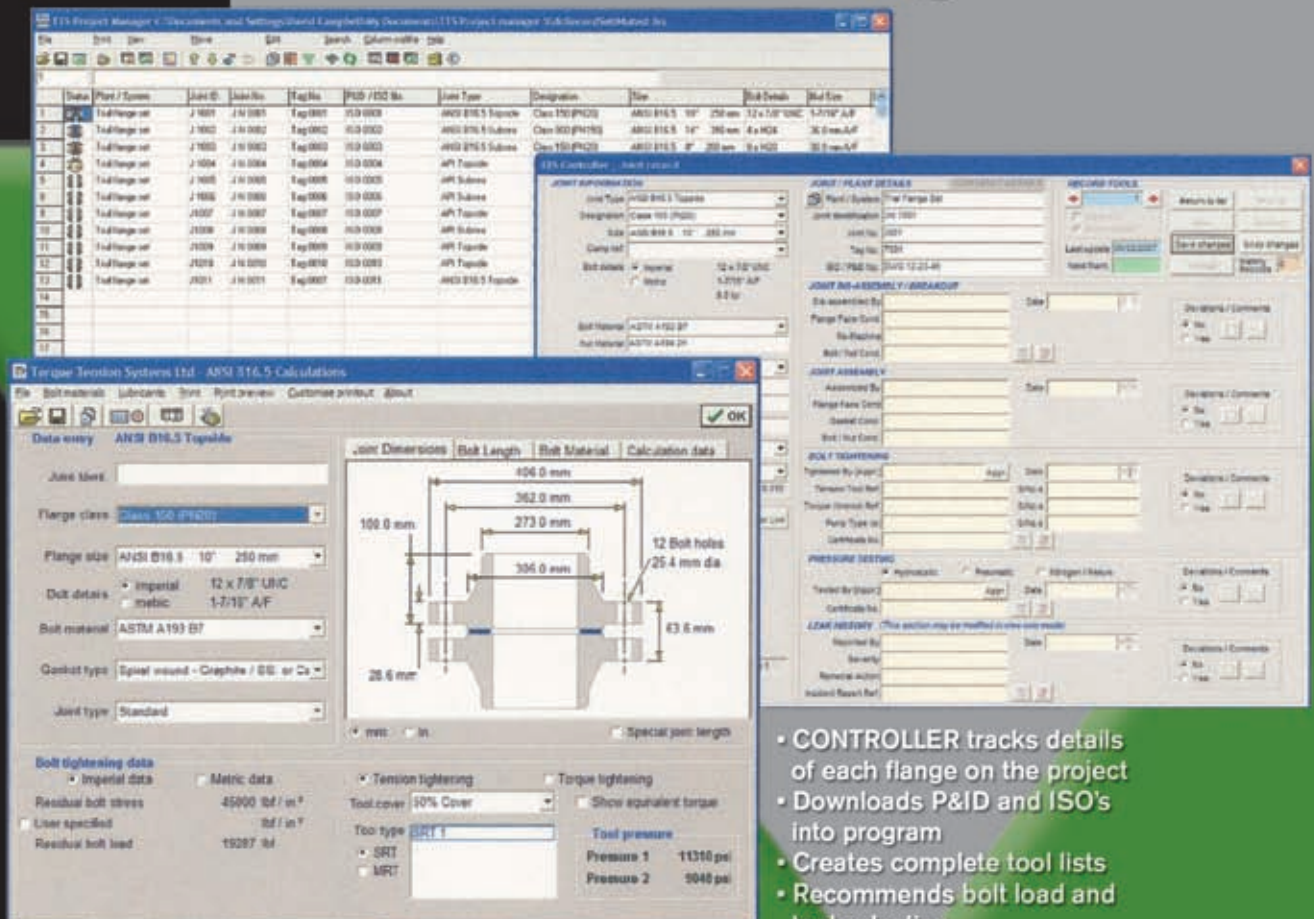

- SRT-Spring return tensioners
- Auto-retract
- Quick release bridge
- Encapsulated socket ring

- SST-Subsea tensioner
- Overstroke protection
- Large view window
- 30mm stroke
- Split reaction nut
- Corrosion resistant

Joint Monitoring Software
