

Introducing the NEW Stone wireless remote controllers!

We now have available four new wireless remote controllers for the 12/24V DC power unit market. The receivers are compact in design, easy to install and are water resistant to IP57. The controllers are also water resistant and fit on your key chain.

These controllers can be quoted on new applications as well as sold loose for aftermarket retrofits. All of our new wireless controllers are FCC compliant. Controller range is 50ft. Special software eliminates the possibility of dual or accidental operation of the system. Our receiver can only be operated by the mated controller.

KIT #	STYLE
