SS140P

PROPANE STABILIZING SYSTEM

The patented SS140P utilizes a small amount of the propane pumping to cool the hydraulic system. This propane is vaporized by the hydraulic oil and then returned into the tank, stabilizing the system. This eliminates the fan motor, producing a smooth and quiet design. In addition, by adding positive head pressure to the pump, we reduce product pump cavitation which increases pump flow rates and reduces maintenance costs.

FOR USE ONLY WITH PROPANE BOBTAILS AND TRANSPORTS

INSTALLER MUST HAVE VALID CT LICENSE TO INSTALL APSCO PROPANE SYSTEM PRODUCTS

BETTER PERFORMANCE	COMPACT DESIGN	INCREASED DURABILITY	EASY INSTALLATION
- Improves propane product pump performance - flow - Reduces tendency to vapor lock or cavitate product pump - Can be used with hydraulic or mechanical pumping systems - UL listed - ASME certified - pressure boundary	9.7" wide mounting flange - Cooling fan is not required - Only 12.7" tall - Uses < 10" of frame rail space 9.7" wide x 8.7" deep x 12.7" tall	- Proven performance since 2004 - Corrosion resistant stainless steel construction - Low maintenance - no moving parts - Industry leading 2 year warranty	- Lightweight - 17 LBS - Mount behind-the-cab or on the frame rail - NPT port connections

Should you not find what you are looking for, contact us at (918) 622-5600

Visit www.apscopower.com for additional part numbers, installation instructions and dimensional drawings

Slimline or Box Slimline
Product Ports 3/4 NPT (Female)
Fan Not required
Basic Dimensions (L x W x H) 8.7 x 9.7 x 12.7"
Finish Stainless Steel
Weight 17 LBS dry
Warranty 2 years

NOTICE

PURCHASER/INSTALLER before proceeding be sure to check the following:

- 1) Do you have a valid CT License? Proceed no further unless you have supplied APSCO with a copy of your CT License.
- 2) This system must be installed and operated in accordance with all DOT regulations and according to the instructions contained inside this manual.
- 3) PURCHASER/INSTALLER must have adequate training on how to operate this system.
- 4) Failure to follow these instructions will void any product warranty and subject the PURCHASER/INSTALLER to any and all potential liabilities associated with this product and/or its use.

We have been designing Thermaflow™ hydraulic systems since 1989! We'll design a hydraulic drive to fit your application. Besides the Model SS140P, we offer a number of other models that can fit higher horsepower applications or custom design a cooling system to your needs.

FOOD GRADE - CHEMICAL - COMPRESSED GAS - CRUDE OIL - VACUUM PUMPS - COMBO DRIVES

RFL-500M
Patent US 11091082B2

Hydraulic Hose Reel System

The REELFLOW manifold is designed to operate the on/off function of the product pump, as well as the in/out/free-spool of the hydraulically driven hose reel. This is accomplished by utilizing a special set of solenoid operated valves inside the manifold. The REELFLOW hydraulic system can work with multiple different hydraulic hose reels but was designed to work best with a hose reel that utilizes a direct coupled 9.7 CID motor.

RFL-500M is intended for use with any hydraulic hose reel application

USER FRIENDLY	SAFETY	KEY FEATURES
- Hydraulic controls allow power in/out and free spool - Reduced maintenance - Combines multiple valves into one	- Simplification and safety of work process by allowing removal of chain and sprocket - Relief valve installed to protect system and operator	- Reduced downtime - Optional custom speed adjustment - RFL-K-SPC - Space saving manifold

APSCO manufactures multiple models of adapters and couplers to fit the Blackmer and Corken product pumps. These allow the user to direct mount motors to the product pumps which leads to a decrease in maintenance costs and an increase in longevity for both motors and pumps.

ADAPTERS

CORKEN	SAE A MOTOR MOUNT		SAE B 4-BOLT
APSCO Model	532PB	542PB	642PB

SS934

HYDRAULIC RESERVOIR, FILTER, AND COOLING SYSTEM

The THERMAFLOW SS934 is designed to supply top performance without using up valuable frame rail space. At only 9.25" wide, it will fit all low horsepower applications with a mounting bracket kit that will simplify your installation. The SS934 will drive most 3" and 4" product pumps and compressors, with options for multiple pump applications.

FOOD GRADE - CHEMICAL - COMPRESSED GAS - COMBO DRIVES

BETTER PERFORMANCE	COMPACT DESIGN	INCREASED DURABILITY	EASY INSTALLATION
- Cooling capacity up to 30 GPM - Optimized heat rejection - Available with electric or hydraulic fan - Air flow path from side to side	- Narrow width, only 9.25" wide - Minimal fan clearance (2" per side) 10-Micron filter element - Integral directional control valve (optional)	- Low maintenance, proven performance - Corrosion resistant design - Stainless steel construction - Easy access to filter element for maintenance - Modular construction for easy service	- Standard rear studs - side frame rail mounting - SAE suction and JIC pressure/return ports for easy piping alignment - Port adapters available upon request - Optional behind-the-cab or no-drill mounts

Model	Flow Rate (GPM)	Reservoir Size (Gallons)	Pressure (PSI)	HP Cooled
ARC-30S	30	4.0	Up to 4,000	20

Capacity 30 GPM

Slimline or Box Slimline

Tank Size 4 Gallon

Suction SAE-24 ORB Female

High Pressure SAE-16 ORB Female

Low Pressure Return SAE-20 ORB Female

Relief Valve Adjustable - 500-3000 psi standard

Fan Hydraulic drive 1.2 GPM

Drain Magnetic plug SAE-8 ORB

Filter Tank top design w/integral breather, 25 PSI bypass

Filter Element 10-Micron, element easily serviceable from top

Oil Level Site Glass Dual bulls eye

Basic dimensions (LxWxH) 20 x 8 x 21"

Cooler Bypass Cold start up - 60 PSI high flow

Case Drain SAE-8 ORB Female

Finish Stainless exterior brushed finish

Pressure Gauge Port SAE-4 ORB Female

Weight 100 LBS

Heat Rejection 20 HP at 30 GPM with 80°F exiting temp. differential

FITTINGS NOT INCLUDED. SEE ACCESSORIES LIST FOR AVAILABLE FITTINGS

SS675

HYDRAULIC RESERVOIR, FILTER, AND COOLING SYSTEM

The THERMAFLOW Model SS675 is a heavy duty compact hydraulic cooling system that is designed to mount behind the cab. The SS675 has the capacity to drive higher horsepower applications. At 12" wide, this unit has plenty of room behind the cab. The SS675 has a no drill mount behind the cab, with either a hydraulic or electric fan.

FOOD GRADE - CHEMICAL - COMPRESSED GAS - CRUDE OIL - VACUUM PUMPS - COMBO DRIVES

BETTER PERFORMANCE	COMPACT DESIGN	INCREASED DURABILITY	EASY INSTALLATION
- Air flow path from side to side - Increased heat rejection - Available with electric or hydraulic fan - Optional off-road or side-dump versions available	- Narrow width, only 12" wide - Minimal fan clearance (2" per side) 10-Micron filter element - Behind-the-Cab mount is standard	- Low maintenance, proven performance - Corrosion resistant design stainless steel construction - Easy access to filter element for maintenance - Modular construction for easy service	- SAE suction port is standard - JIC pressure and return ports for easy piping alignment - Port adapters available upon request - Optional no-drill mount available

Should you not find what you are looking for, contact us at (918) 622-5600

AM2 SERIES

APSCO PERFORMANCE MOTORS

APSCO's hydraulic orbit motor is specifically designed to excel in low-speed, high-torque applications. Engineered with utmost precision, these motors are up to the challenge in food grade, compressed gasses, and auger applications. With its exceptional torque output and reliability our hydraulic orbit motor provides superior performance and optimized efficiency, even under the most demanding conditions. Its heavy-duty design ensures precise control and seamless operation, allowing the user to tackle heavy-duty tasks with ease and precision.

Performance	Design	Durability
High efficiency with low pressure drop Proven reliability	• Common displacements and shaft configurations in stock • Both staggered and opposite porting for versatility • Compact body	Heavy duty bearings 3050 continuous, 3990 intermittent pressure rating Three zone design for longer life

AM4 SERIES

APSCO PERFORMANCE MOTORS

APSCO's hydraulic orbit motor is specifically designed to excel in low-speed, high-torque applications. Engineered with utmost precision, these motors are up to the challenge in oil and gas applications. With its exceptional torque output and reliability our hydraulic orbit motor provides superior performance and optimized efficiency, even under the most demanding conditions. Its heavy-duty design ensures precise control and seamless operation, allowing the user to tackle heavy-duty tasks with ease and precision. In addition, this motor is directly interchangeable with the 109-1101.

Performance	Design	Durability
High efficiency with low pressure drop Proven reliability	Common displacements and shaft configurations in stock Staggered and opposite porting for versatility Compact body	Heavy duty bearings 3050 continuous, 3990 intermittent pressure rating Three zone design for longer life

AP20

APSCO PERFORMANCE PUMP

The APSCO AP20 gives the consumer excellent power output due to the the durable high-strength cast iron body. The AP20 also has extreme durability and resistance to fluid contamination due to its unique roller bearings. The pump also has optimized efficiency due to the balanced thrust plates included in the model. In addition, this pump is directly interchangeable with the PGP020A646JEAL17-25.

PUMP SPEED (RPM)	THEORETICAL FLOW (GPM)

APSCO's APG Series directional control valves are sectional, directionally controlled, and interchangeable with the very popular VA and VG series hydraulic valve product lines. The APG valves can be used in parallel or open center circuit applications with manual, hydraulic, or pneumatic operation.

- The APG 20 Series has a nominal capacity of 40 GPM and a max operating pressure of 3500 PSI
- The APG35 Series has a nominal capacity of 70 GPM and a max operating pressure of 3500 PSI
- The compacted graphite cast construction allows for a max operating pressure of 3500 PSI
- Interchangeable with the very popular VA and VG series hydraulic valve
- Available in individual components or we can build you a custom engineered and tested valve assembly
- 100% factory tested

APG 20 SERIES

FEATURES:

- Compacted graphite for shock load resistance and higher pressure needs
- Full flow relief valves and low open center pressure drop
- Parallel circuit design permits all spools to be operated independently or simultaneously with the lightest load receiving priority
- Precision machined spools are hard chrome plated for maximum life and corrosion resistance
- Stackable sectional design allows for customizing the assembly to your specific needs
- Work sections are 100% pre-assembled and pre-tested before shipping
- Large variety of spool types and back cap actions. Transition load checks are standard to prevent load shifting between spool positions
- Wide range of work port options including port reliefs, anti-cavitation valves, port restrictors, and H.P.C.O. (High-Pressure Carry Over) power beyond providing flexibility for all your design needs

APG 20 SERIES TECHNICAL DATA

Directly interchangeable with the popular DA20 and DG20

Design Type..... Sectional
Circuit..... Parallel/open center
Material..... Compacted graphite, high strength iron alloy
Capacity..... 40 GPM nominal
Max. System Pressure..... 3500 PSI - using SAE porting
Relief Valves... Differential type adjustable from 800 to 3500 PSI

APG 35 SERIES

FEATURES:

- Compacted graphite for shock load resistance and higher pressure needs
- Full flow relief valves and low open center pressure drop
- Parallel circuit design permits all spools to be operated independently or simultaneously with the lightest load receiving priority
- Precision machined spools are hard chrome plated for maximum life and corrosion resistance
- Stackable sectional design allows for customizing the assembly to your specific needs
- Work sections are 100% pre-assembled and pre-tested before shipping
- Large variety of spool types and back cap actions. Transition load checks are standard to prevent load shifting between spool positions
- Wide range of work port options including port reliefs, anti-cavitation valves, port restrictors, and H.P.C.O. (High-Pressure Carry Over) power beyond providing flexibility for all your design needs

APG 35 SERIES TECHNICAL DATA

Directly interchangeable with the popular DA35 and DG35

Design Type..... Sectional
Circuit..... Parallel/open center
Material..... Compacted graphite, high strength iron alloy
Capacity..... 70 GPM - 226 LPM - Nominal
Max. System Pressure..... 3500 PSI - using SAE porting
Seal Type..... Buna-N
Relief Valves..... Differential type adjustable from 80 to 3000 PSI - 103.5 to 207 BAR
Preset at 2000 PSI - 138 BAR

Available in individual components or we can build you a custom engineered and tested valve assembly.

APSCO's APV Series directional control valves are sectional, directionally controlled, and interchangeable with the very popular V20 Series. The APV valves can be used in parallel or open center circuit applications with manual, hydraulic, or pneumatic operation.

FEATURES:

- APV 20 Series - compact size and lightweight to fit your installation needs.
- Compacted graphite, high-strength iron alloy for durability and shock load resistance.
- Precision machined spools with extra fine metering control and low spool forces.
- Available in SAE porting
- Stackable design to customize to your needs.
- Large variety of spool types and back cap options.
- Range of work port options including port reliefs, anti-cavitation valves, and power beyond capabilities
- Black phosphate finish for improved paint adhesion and reduction of surface rust.

HYDRAULIC SELECTOR VALVE THREE-WAY TWO-POSITION

APSV-100-A
APSCO hydraulic selector
valve with air shift

APSV-100-M
APSCO hydraulic selector
valve with manual shift

The APSCO APSV-100 is a three-way, two-position, selector valve. It is designed for directing flow from the pump to one of two hydraulic circuits. It is available as a manual shift or a pneumatically actuated valve that can be operated from the cab.

- Designed for multiple mobile applications
- Available with pneumatic direct mount actuator for use in single or double acting applications
- Available with 2-position manual push/pull control
- No exposed moving parts

Should you not find what you are looking for, contact us at (918) 622-5600

Visit www.apscopower.com for additional part numbers, installation instructions and dimensional drawings

Operation: Flow enters the valve at the inlet port. When the actuator is pushed in, the spool shifts, allowing the inlet flow to reach the work port furthest away from the actuator. When the actuator is pulled out, the spool shifts allowing the inlet flow to reach the work port closest to the actuator.

- Flow rates up to 60 GPM
- Max working pressure up to 4000 PSI
- Port size & thread = SAE-16
- Ductile cast iron body
- Chrome-plated spool
- Metering notches for smooth transition
- Buna-N seals
- 2 bolt, any position mounting
- Manual or pneumatically actuated options

Should you not find what you are looking for, contact us at (918) 622-5600

Visit www.apscopower.com for additional part numbers, installation instructions and dimensional drawings

APTV TIPPING VALVE

SINGLE PRESSURE AVAILABLE

APTV-100 Single Pressure [Raise-Hold-Lower]

FEATURES:

- Built in load check
- 1/8" NPT gauge port or indicator switch option on pressure port
- Ductile cast iron body
- Lightweight 2.3 lbs design with small envelope
- Single pressure direct acting relief
- 3 position [Raise-Hold-Lower]
- Direct tank mounting options

A perfect complement to
APSCO's AV Series valves

Single pressure model: 2500 PSI

Port size: SAE-16 O-ring

Recommended Filtration: 25-Micron

PART NUMBER:

APTV-100 Single Pressure [Raise-Hold-Lower]

SHIFT OPTIONS:

1. AV Air Shift

Markets: Dump truck, Walking floor, Dump trailer, Wetline kits, Combo kits

CONV-APS-8

CONV-APS-18

CONV-APS-10

OVERVIEW:

APSCO generic consoles intended for **End Dump Truck/Trailer** applications come in several configurations with options to control the hoist cylinder and engage the truck PTO. Standard features include a stainless steel lid with laser etched verbiage and powder coated steel base with access panel. Common features include openings for a tarp switch, tailgate air control valves, warning lights, and plugged openings for additional electric rocker switches or air control valves.

FEATURES & OPTIONS:

Slimline and modular expansion base designs available	Air tailgate controls (latch & lift cylinders)
Single axis feathering control hoist valve (VM-Series) options	Bed-up warning light
PTO/Hoist control valves (AV-295 Series) options	PTO engaged warning light
Hoist only control valves (AV-195 Series options)	Tarp switch openings
Options to engage the PTO with air or electric rocker controls	Blank openings for additional electric rocker switches or air valves

DUMP CONSOLE - AIR PTO CONTROLS

Standard features: PTO light, hoist control, tailgate latch control, and a side panel access.

CONV-4E

OVERVIEW:

Intended for use with APSCO **Modular Expansion** console assemblies. Standard features include a stainless steel lid with laser etched custom verbiage and logo. The user can easily add additional electric switch(s) and/or lift axle controls to their console assembly. It provides the flexibility to satisfy multiple project requirements when combined with a console assembly designed for modular expansion.

FEATURES & OPTIONS:

Options for mounting on left, right, front or rear of console assemblies designed for modular expansion

Lift axle controls include pressure gauge, regulator and push-pull valve

Powder coated steel base with access panel.

Steerable and non-steerable lift axle control options are available

Use with APSCO "VR" or "VRN" electric rocker switches (hole plugs available upon request)

MODULAR EXPANSION CONSOLES

Product Item Code	Description	Mount Orientation
CONV-3A-LSM	LIFT AXLE, NON STEERABLE	Left
CONV-3AE-LSM	LIFT AXLE, STEERABLE	Left
CONV-3A-RSM	LIFT AXLE, NON STEERABLE	Right
CONV-3AE-RSM	LIFT AXLE, STEERABLE	Right
CONV-3A-SM-1	LIFT AXLE, NON STEERABLE	Rear
CONV-3A-SM-2	LIFT AXLE, NON STEERABLE, LESS REGULATOR	Rear
CONV-UNI-3A	LIFT AXLE, NON STEERABLE	Rear
CONV-UNI-3AE	LIFT AXLE, STEERABLE	Rear
CONV-4E-CAR	CARLING (VRN) SWITCH OPENINGS = 0.83" X 1.45"	Right of Left
CONV-4E-VR	EATON (VR) SWITCH OPENINGS = 0.87" X 1.74"	Right of Left

Visit www.apscopower.com for additional part numbers, installation instructions and dimensional drawings

Let APSCO work with you to develop a control console that meets your needs and application. We will work closely with you to design a console that will bring savings to your operation and value to your customers.

2-6

OVERVIEW:

Standard features include a stainless steel lid with laser etched custom verbiage and logo. Common features include AV-Series or VM-Series mounted air control valves, electric rocker switches, push-pull air control valves, warning lights/buzzers, and additional blank openings for optional electric rocker switches or air control valves.

COMMON AVAILABLE OPTIONS:

USB charging ports

Fuse panels

Various warning lights and buzzers options available

Backlit electric rocker switch options

Powder coated steel base with access panel.

Various rocker, button, and toggle switch options

Lift axle controls, regulators, and pressure gauges

Options to mount modular expansion consoles to satisfy future project requirements

Pre-plumbed air and electrical wiring harness

A minimum quantity is required for your order to request a unique console assembly. Please contact us at sales@apscopower.com or at (918) 622-5600 for more information.

CON-3AE

OVERVIEW:

APSCO'S Lift Axle Control Panels are made with a 14-gauge, stainless steel face plates populated with a push-pull valve, regulator, and illuminated gauge. This panel is also offered with an electric solenoid to facilitate steerable lift axles, raising the axle when put in reverse gear.

FEATURES & OPTIONS:

Pre-plumbed offers quick, easy installation

Illuminated gauge

3/8" and 1/4" outlets available

Optional electric solenoid available with auto lift activation when docking vehicle with steerable axle.

When energized the valve shifts and will remain switched until it is manually reset by pushing in the spool on the valve

Private label available for volume orders

LIFT AXLE CONTROL PANEL ASSEMBLIES - PART NUMBERS

PART #	DESCRIPTION
CON-3	LIFT AXLE PANEL WITH 3/8" FITTINGS (REGULATOR & GAUGE ONLY)
CON-3A	LIFT AXLE PANEL WITH 3/8" FITTINGS (FOR NON-STEERABLE APPLICATIONS)
CON-3A-25	LIFT AXLE PANEL WITH 1/4" FITTINGS (FOR NON-STEERABLE APPLICATIONS)
CON-3AE	LIFT AXLE PANEL WITH 3/8" FITTINGS AND ELECTRIC SOLENOID (FOR STEERABLE APPLICATIONS)
CON-3AE-25	LIFT AXLE PANEL WITH 1/4" FITTINGS AND ELECTRIC SOLENOID (FOR STEERABLE APPLICATIONS)

LIFT AXLE CONTROL PANEL - PARTS LIST

PART #	DESCRIPTION
VX-4	2 POSITION 4 WAY PUSH-PULL VALVE W/ 1/4" PORTS
VL-5-ES	2 POSITION 4 WAY PUSH-PULL VALVE W/ 1/4" PORTS AND SOLENOID
RK-1600	PRESSURE REGULATOR 1/4" PORTS 135 CFM @ (100PSI (0-125PSI)
6000	ILLUMINATED GAUGE (0-160 PSI)

ALC-100

ALC-110

OVERVIEW:

APSCO'S Lift Axle Control Enclosures are intended to be mounted outside of the cab for use in harsh outdoor environments. The control valves are mounted within a waterproof polycarbonate enclosure. Each valve body port is clearly labeled with easy access, external to the enclosure. APSCO lift axle controls are suitable for use with non-steerable or steerable axles (ability to automatically raise the lift axle when reverse gear is engaged).

We offer various design options including:

- Air pilot control
- Electric solenoid control
- Push-pull valve control
- Internal and external accessible pressure regulator/gauge
- Wiring and tubing harness options

FEATURES & OPTIONS:

Durable impact resistant polycarbonate enclosure	Continuous silicone rubber gasket for watertight seal
Corrosion resistant design	NEMA & IP ratings for outdoor use
Weatherproof design ensures internal components are protected in any environment	Stainless steel hardware

From the beginning, APSCO products have been designed and manufactured for the heavy truck and mobile equipment industries. Our tailgate latch cylinders are no exception. In today's tailgate locking applications, a stable, reliable, and fast latch is mandatory. More drivers, manufacturers, and distributors are counting on APSCO tailgate latch kits to ensure a quick and strong latching or unlatching of the tailgate. Operators have peace of mind that their cylinders will remain durable over time and in harsh environments.

With a variety of strokes and bores to fit nearly any body or trailer, APSCO tailgate latch cylinders have become the leader in the industry for OEMs, aftermarket and replacement parts.

APSCO valve and fitting kits are available for all cylinders, making installation efficient and easy.

3-1

Features and Benefits

Proven design – maintenance and service free

High tensile steel rods – plated for corrosion resistance

Manufactured in the USA – highest quality assured

Options

Piston rod available in stainless steel

Any cylinder can be ordered complete with clevis and pins

Spring return cylinders are also available

Various stroke lengths available upon request

Low temperature seals

STANDARD

APSCO air cylinders offer a variety of solutions for your dump trailer or dump body's high lift tailgate needs. Designed for the truck and mobile equipment industries, rod wipers come standard on every high lift cylinder; as well as bearing blocks on the longer strokes. Choose the same high lift cylinder chosen by dump body manufacturers all over the world, APSCO high lift. APSCO valve and fitting kits are available for all cylinders, making installation efficient and easy.

TWIN

In the past dump bodies with higher sides and gates, had to sacrifice bed width to accommodate the larger cylinders needed to lift the gate while staying within DOT regulations. APSCO engineers applied experience and innovation to provide a solution to the problem, while remaining cost effective. Our twin high lift cylinder provides all the necessary force required for taller gates, while fitting in a footprint that is 4" wide.

ROUND

Our round cylinder design was developed in response to OEM initiatives to make trailer and body designs lighter. Our innovative design eliminates traditional tie rods and end caps resulting in **weight savings of up to 60% of traditional designs.**

Features and Benefits

- High tensile steel rods – plated for corrosion resistance for years of service free operation
- Manufactured in the USA – highest quality assured
- Lightweight design – allows greater payload

Dump Pump Actuators

Hydraulic Valve Actuators

Options

The APSCO DM Series air actuators control the opening and closing of hydraulic valves or operating dump pumps. Metering air actuators provide a cost effective alternative to cable controls. APSCO's solution saves labor and installation costs by eliminating the service and maintenance issues associated with cable controls. APSCO offers the DM series with or without metering (proportional or feathering control).

Features and Benefits

- Simple 3 step installation – saves valuable installation labor and cost
- No exposed moving parts – allows years of service free operation
- Non-binding technology – provides the very best performance and function
- Compact size = weight savings

AV-195 Series:

The AV-195 addresses the needs of vehicles that have an electric PTO and/or PTO controls already installed in the vehicle cab. APSCO's AV-195 is available with the same console options as our AV-295.

Standard Features Include:

- Positive detent lock in neutral position
- Metered hoist control capability in lowering position
- Push to connect fittings for 1/4" DOT tubing

Available Options:

- Spring to neutral hoist control handle

AV-295 Series:

The original AV-295 Valve provides a compact design to operate the dump hoist and integral PTO air valve to operate the dump pump. As a stand-alone valve or with a console, operating a dump body has never been easier.

Standard Features Include:

- Positive detent lock in neutral position
- Metered hoist control capability in lowering position
- Push to connect fittings for 1/4" DOT tubing
- Automatically disengages PTO when hoist handle is moved into lowering position
- Safety lock on PTO valve to prevent accidental engagement
- PTO engaged LED indicator light

Available Options:

- Spring to neutral hoist control handle
- Manually disengage PTO valve

Features and Benefits:

Paired with APSCO's AV-295 valve the EC-PTO converts the pneumatic PTO output to an electric signal.

The EC-PTO kit allows for fully integrated hoist/PTO control for hot shift PTO's.

Hot shift PTO's can now be automatically "kicked out" when hoists are lowered using the APSCO EC-PTO kit.

5-5

EC-PTO Kit Parts List

APSCO now offers its VM Series valves fitted with electrical switches and back lights. Before, only the valve handle was available with these options. Now, switches and light kits are available in these inclusive assemblies.

Features and Benefits

APSCO's patented "Continuous Connection Technology" utilizes a rotary connection to eliminate the use of wire to bridge the rocker assembly. This allows power to be routed to the handle, uninterrupted, eliminating wire fatigue, chaffing, and pinching associated with traditional designs.

How to identify valves in a bank

VM7-2B2020

VM7-5B4535S3545

VM7-3B35835

EXAMPLE 1:

EXAMPLE 2:

Key:

Default = VM-7
8 = VM-8
9 = VM-9
11 = VM-11
12 = VM-12
13 = VM-13
SP = Spacer

S = Straight Handle
20 = 20 Degree Handle
35 = 35 Degree Handle
45 = 45 Degree Handle
55 = 55 Degree Handle

LK = Light Kit
EO = On/Off Switch
EM = Momentary Switch

A = Detent Forward
B = Detent Back

6-2

A minimum quantity is required for your order to request a unique valve assembly. Please contact us at sales@apscopower.com or at (918) 622-5600 for more information.

VM-DUAL AXIS VALVES

STEP 1: SELECT DETENT OPTION

PART#	DESCRIPTION
VM-10-W	Quad Control Valve Williams Plate
VM-10-C	Quad Control Valve 4.25" Dia. mount
VM-10-R	Quad Control Valve 4.93" Dia. mount

STEP 2: SELECT ELECTRICAL OPTION

OPTION	SUFFIX
NONE	N/A
LIGHT KIT	-NR-LK
ON/OFF SWITCH	-NR-EO
MOMENTARY SWITCH	-NR-EM
3 POSITION MOMENTARY SWITCH	-NR-3M

STEP 3: SELECT DETENT OPTION

OPTION	SUFFIX
NONE	N/A
DETENT CLIP	-D

VM-10-C

VM-10-NR-D

New Feature

CONB-1-S

CONB-2

CONB-3-R

APSCO manufactures a range of consoles to house its VM Series, single axis, and dual axis controls. The VM consoles are made of 14 gauge steel with a textured black powder-coating.

Cut outs for a rocker switch and indicator light are available in the 2 and 3 bank consoles. Plugs and blanks are available to cover openings not used.

[VM Series Valves.](#)

VM CONSOLE ASSEMBLY PART NUMBERS

PART#	CONSOLE ACCOMMODATES	HEIGHT	WIDTH	LENGTH
CONB-1-S	VM-7	13.00"	4.56"	5.25"
CONB-1-S8	VM-7	8.00"	4.56"	5.25"
CONB-1-S6	VM-7	6.00"	4.56"	5.25"
CONB-1-R	VM-7 and VR-9-S (rocker)	13.00"	5.25"	5.25"
CONB-2	(2) VM-7	13.00"	5.25"	5.25"
CONB-2-R	(2) VM-7 and VR-9-S (rocker)	14.00"	7.25"	6.75"
CONB-3-R	(3) VM-7 and VR-9-S (rocker)	14.00"	7.25"	6.75"

PED 4-11

PED 6-11

PED 4-11-2P

PED 10-3-2P

S-Tube

POSI-LOCK Pedestals

The Posi-Lock Pedestal® (Patent # 7,568,666) is designed to house APSCO's VM Series valves. The Posi-Lock Pedestal®, once mounted to the floor, can be unlocked and rotated into any position. A simple ¼" turn releases the pedestal head or "S" tube, and another simple ¼" turn provides a positive lock. It is so simple that controls can be swung in for operation and swung out of the way when it's time to drive on.

Features and Benefits

- Available in 2 standard heights (29½" and 33½")
- Configurations available to hold up to 8 VM Series valves
- Removable rear cover for easy access
- Simple installation saves time and labor costs
- Round tubing and smooth curves allow ¼" tubing to be installed snag-free with ease
- Will house up to 18 (ea) ¼" tubes
- Functional, ergonomic design provides user-friendly operation

- Compact design, operates and sequences both tailgate latch and high lift cylinders
- Electric or air control options
- Simplified operation - Operate both lift and latch functions from a single operator input
- Consolidated design allows easy installation, less fittings, less plumbing, and less labor
- Designed and manufactured for the mobile equipment market

Features

APSCO pioneered the use of air controls for winches in the 1960's. Our understanding of the application and the harsh operating environments position us as the first and only choice among leading winch manufacturers. All of our winch kits are tailored to specific winch designs and include clutch cylinders, brake cylinders, controls, tubing, fitting, and all the required hardware for mounting.

PTO Kit

Features

APSCO's PTO control kits are easy to install and provide operator efficiency. Available in two, three, and four positions our kits are supplied complete with cylinder, control valve, tubing, fittings, and mounting hardware. If you do not see the PTO application you need listed below, please call us at (918) 622-5600.

PTO KIT PARTS LIST

MANUFACTURER	APPLICATION	KIT NUMBER
Parker. Chelsea	86, 860, 861, 862, 863	PC-7-2
Muncie	838	PMV-8

9-3

CLUTCH KITS

Features

APSCO's Vehicle clutch control kits provide positive control of the vehicle clutch from one or two remote locations. Actuated from the cab, or "bed side", our clutch control kits provide engaging and disengaging of the vehicle clutch. All kits are complete with an APSCO spring return cylinder, 3-way control valve, tubing, and fittings.

CLUTCH KIT PARTS LIST

KIT NUMBER	STROKE	VALVES
CL-3	3"	C-5050-RP
CL-4	4 1/2"	C-5025-RP
CL-6	6"	C-5045-RP

Visit www.apscopower.com for additional part numbers, installation instructions and dimensional drawings

Features

The ACT-5 air kit is your solution for operating pneumatic controls on trucks that are NOT equipped with air brakes.

APSCO's ACT-5 kit includes:

- | | |
|-----------------------------------|--------------------------------|
| 12V DC electric air compressor | Pressure switch (85-105 PSI) |
| 2 gallon air reservoir tank | 1/4" DOT air tube (30 ft) |
| 10 gauge 2 conductor wire (10 ft) | 1/4" tube x 1/8" NPT fittings. |

9-4

12 Volt Air Compressor with Mounting Hardware & Remote Air Breather Features:

- CFM: 1.38
- Max Pressure: 150 PSI
- Max 12V Amp Draw: 21 amps
- Duty Cycle: 33% @ 100 PSI
- Fill Rate (2.5 gallons): 0-105 PSI @ 155 sec/85-105 PSI @ 40 sec
- Vibration Isolators
- Thermal Overload Protection
- Remote Air Breather
- Pressure Switch

Shipping Weight: 9 LBS
Dimensions: 8" long x 4" wide x 6.75" tall

Air Tank Features:

- (4) 1/4" Ports (located side, top & bottom of the tank)
- (2) 3/8" Ports (located both ends of the tank)
- Red Oxidized Coated Interior to resist Rust
- D.O.T. Approved
- Powder Coated Gloss Black

Shipping Weight: 13 LBS
Dimensions: 17" long x 6" wide x 8" tall

Visit www.apscopower.com for additional part numbers, installation instructions and dimensional drawings

Features and Benefits:

Paired with APSCO's AV-295 valve the EC-PTO converts the pneumatic PTO output to an electric signal.

The EC-PTO kit allows for fully integrated hoist/PTO control for hot shift PTO's.

Hot shift PTO's can now be automatically "kicked out" when hoists are lowered using the APSCO EC-PTO kit.

EC-PTO Kit Parts List

Part #	Description	Where Used	Rating
EC-PTO	KIT	master kit	
5799	PRESSURE SWITCH (1/8 NPT)	EC-PTO	Normally Open, MAWP = 145 PSI, 8.33 amps @ 12V DC
WH-EC-PTO	WIRING HARNESS (15 FT)	EC-PTO	
1707	1/4 DOT TUBE X 1/4" LONG	EC-PTO	
4424	FITTING, 1/4 TUBE X 1/8 FNPT	EC-PTO

Acceptance of Buyer's Order shall be conditioned upon and subject to these terms and conditions. No other term that purports to vary these Terms and Conditions, shall be binding upon APSCO unless set forth in writing signed by APSCO. Additional terms listed on the reverse side hereof, if inconsistent herewith, shall control and be deemed a part hereof. All negotiations, proposals and representations, if any, made prior and with reference hereto are incorporated herein. This writing shall constitute a complete and exclusive statement of the terms of the agreement between Buyer and APSCO.

1. Prices and shipping terms are F.O.B. APSCO's dock Tulsa, Oklahoma. Payment is due net thirty (30) days after the rendering of this invoice and is to be made in the U.S. funds or their equivalent. - Buyer agrees to pay a sum equal to 18% per annum until paid and all cost of collection, including attorney's fees, on any sums not paid when due.

2. Dates of delivery are determined from the date of APSCO's acceptance of any order by Buyer and are estimates of approximate dates of delivery, not a guaranty of a particular day of delivery. APSCO shall not be liable for failure or delay in shipping goods if such failure or delay is due to an act of God, war, labor difficulties, accident, inability to obtain containers or raw materials, or any other causes of any kind whatever beyond the control of APSCO.

3. Prices do not include, and Buyer agrees to pay any tax, duty, tariff or other assessment imposed by federal, state or other governmental authority on the sale of the merchandise and service shall be paid by Buyer in addition to the purchase price.

4. Buyer hereby indemnifies, agrees to hold harmless and defend APSCO, its officers, directors, employees, agents, divisions, subsidiaries and affiliates from and against any, and all, liabilities, claims, losses, damages, costs and expenses (including without limitation, special and consequential damages, damages for patent infringement or similar cause of action) resulting from Buyer's use, furnishing of any specification, plan, design, or modification of the goods; omission, neglect, or Buyer's misapplication of proprietary or other information furnished regarding the goods sold by APSCO, whether or not the goods or information originated with APSCO; and further from any, and all, damage to property or personal injury or death arising out of or attributable to the goods, including but not limited to any part not manufactured by APSCO. Buyer accepts all responsibility for the installation and use of adequate safety guards and devices and agrees to hold APSCO harmless in the event of personal injury resulting from inadequate safety guards or devices.

5. APSCO warrants to the original Buyer only. The goods sold conform to the specifications set forth on the invoice and shall be tested to indicate that the same are free from defects in materials and workmanship under normal recommended use for 1 year of service, but in no case more than 2 years beyond the original date of purchase. Thermaflow SS models are 2 years from the date of purchase. Except for the warranty that the goods are made in a workmanlike manner and in accordance with the specifications therefore supplied or agreed to by buyer and are made or packaged pursuant to the customary manufacturing procedures of APSCO, TO THE EXTENT NOT IMPERMISSIBLE UNDER APPLICABLE LAW THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED;

INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WHETHER ARISING BY LAW, CUSTOM OR CONDUCT. THE FOREGOING RIGHTS AND REMEDIES ARE EXCLUSIVE AND IN LIEU OF OTHER CLAIMS, RIGHT OR REMEDIES WHATSOEVER, WHETHER STATUTORY OR BASED ON CONTRACT, TORT OR OTHERWISE.

6. APSCO's obligation under this warranty is limited to repair or replacement of any part judged defective by APSCO at a point designated by APSCO. APSCO will not be liable for any consequential damages, loss or expense arising in connection with the inability to use its good for any purpose whatever. APSCO's maximum liability shall not in any case exceed the contract price for the goods claimed to be defective or unsuitable. This warranty does not apply to any goods manufactured by manufacturers other than APSCO, which are separately warranted by such other manufacturers (appropriate adjustments therefore being provided by their respective manufacturers); and any of the goods which have been altered, subjected to misuse, negligence or accident.

7. The products covered hereby shall be deemed finally inspected and accepted within ten (10) days after delivery thereof, unless notice of non-conformity is given in writing to APSCO within said period. Acceptance as aforesaid shall be deemed full performance of APSCO's obligation hereunder.

8. APSCO shall not be responsible for products that have been modified in any way after leaving APSCO's facility, and APSCO does not assume responsibility for any rework applied to parts without its consent. No goods shall be returned without APSCO's permission. Defective material will be replaced or credited, whichever APSCO elects.

9. This Agreement shall be governed by the laws of the State of Oklahoma, United States of America, without regard to its provisions for conflict of laws. The parties specifically exclude application of the United Nations Convention on Contracts for the Sale of Goods. The parties agree that each will in good faith attempt to resolve any controversy or claim arising out of or related to this agreement promptly through negotiations between authorized representatives of APSCO and Buyer within ninety (90) days of such claim or written notice of dispute. Should such negotiations not resolve such claim or dispute within such period, such claim or dispute shall be finally settled under the Rules of the American Arbitration Association by one or more arbitrators appointed in accordance with the Rules thereof, and whose decision will be binding upon both parties. The arbitration proceedings, if any, shall be conducted solely in the English language, including any documentation supplied by the parties in connection therewith. Application may be made to any court for confirmation of any award rendered in any arbitration proceeding having jurisdiction over the parties for a judicial acceptance of such award and for an order of enforcement or other legal remedy as the case may be. The arbitration proceedings shall be conducted in the City of Tulsa, Oklahoma, United States of America. Consent is hereby given to the jurisdiction of any court regarding any matter arising out of such arbitration or the enforcement of any such award. The arbitral award shall be final and binding upon both parties. Application may be made to any court for confirmation or enforcement of any such award having jurisdiction over the party against whom such enforcement is sought. Each party represents that any such arbitral award shall be enforceable against it under the laws of its domicile.

This Return/Restock Policy relates to new assembly/packages and aftermarket parts. All order return requests must be initiated through the APSCO Customer Service group in Tulsa, OK. Return/restock fees are dependent upon the classification of product, the timing of the order return request and require the assemblies to be shipped at the cost of the returning party. The return must be received by APSCO within 10 working days of the issuance of the return authorization. The return /restock fee, reflected as a percentage of the net sales value of the order, is based on the number of days after the ship date that the return request was received. The table below defines the restock fee schedule based on qualifying conditions expressed in this policy.

Items returned must be in their original packaging/mounting and must not have been altered or installed/used in any manner. Credit will not be granted until the returned item is inspected, determined to be in saleable condition as a new item, and returned to new machine or parts inventory. The returning party may choose to have items that fail restock inspection to be sent back to them at their cost or scrapped by APSCO. All order return requests are subject to approval by APSCO product management. APSCO product management reserves the right to modify return/restock fees as appropriate or after inspection of the returned item. Requests outside of this policy must be approved by product management.

Product Classification	0-30 Days	31-60 Days	61+ Days
STOCK (NON-PROPRIETARY) ITEMS*	20%	25%	No Returns Allowed Without Product Management Approval
NON-STOCK/PROPRIETARY ITEMS	80%	90%	
Aftermarket Parts/Spares	20%	20%	

*STOCK ITEM does not include assemblies with modifications, extra options or special configurations.
